BULLER DISTRICT COUNCIL

SOLID FUEL BURNER CHECKSHEET

(Attachment to Building Consent Application)

Owner: _____

Project Location: _____

1.	Make and Model of appliance:	
	Clean Air Certification No: (if applicable)	
2.	Is appliance/flue new or second hand?	☐ New ☐ Secondhand
	If appliance or flue is second hand, complete the Supporting Evidence Document (pg 2)	☐ N/A ☐ Supporting Evidence Document is attached
3.	Hearth construction and thickness:	
4.	Air gap between hearth and timber floor: (only required for some models)	
5.	Distance hearth projects from appliance -	Front: Sides:
6.	Distance from wall:	To back of appliance: To side of appliance:
7.	If on an angle – distance from corner of applicance:	
8.	a) State method of wall protection, if required (heat resistant materials eg brick with 25mm air gap.)	
	b) Is a flue heat reflector to be installed?	☐ Yes ☐ No length
9.	Type of flue kit: :	◯ Single ◎ Double Shield ◯ Spiroloc Shield
10.	Will the flue be vented from the room, ceiling cavity or outside?	☐ Room ☐ Ceiling cavity ☐ Outside
11.	Flue flashing details and height above ridge/roofline:	
12.	a) Does the flue pass through the ceiling or wall?	☐ Ceiling ☐ Wall
	b) If wall, state type of wall protection:	
13.	Distance from outer shield to framing timbers:	
14.	a) Is this appliance replacing an existing appliance? (If yes, please state details)	☐ Yes ☐ No
	b) Is there existing connections/features as noted:	☐ Wetback ☐ Open vented cylinder ☐ Tempering valve
15.	If not replacing an existing appliance, will it be connected to a wetback and open vented cylinder?	☐ Yes ☐ No
16.	What is the free height above appliance?	
17.	State type of fixing to hearth (not less than 8mm diameter bolts. Wet backs are not seismic restraints).	
18.	State method of the early warning system in case of fire. **These are to be installed before final inspection.**
