That Council require all supplies to rural and rural/residential properties to be metered with existing unmetered supplies being metered at Council's cost and all new supplies being metered at the consumer's cost.

That backflow preventers be required to be installed on all rural and rural/residential properties where, in the Council's opinion, there is a likelihood of contaminated water being sucked back or syphoned into the main water supply. Furthermore, that all existing supplies that have not had backflow preventers installed shall have them installed at Council's cost and all new supplies shall have them installed at the consumer's cost.
