REQUIREMENTS FOR OBTAINING BUILDING CONSENTS

Building consent applications can now be lodged online at <https://consents-westcoast.abcs.co.nz>. **Hard copy applications** will still be accepted and these must be made on the prescribed form.

DEPOSIT AND FEES

Building consent applications require either a DEPOSIT or SET FEE to be paid at time of lodging the application. In the case of a deposit being required, costs over and above the deposit will be charged after the consent has been processed and fees calculated. You still need to pay a deposit for consents lodged electronically and this can be done by internet banking referencing the applicant name and site address to which the building work relates. The consent will not be released until any outstanding fees are paid.

Processing fees charged are based on administration, processing time, inspections anticipated, Code Compliance Certificate, any applicable levies and any other fees such as photocopying, title endorsement etc.

When extra or re-inspections are required, or additional costs for amended plan approval, the owner will be required to meet those costs on completion of the project and before the Code Compliance Certificate will be issued.

RESTRICTED BUILDING WORK

- Restricted building work (RBW) is work that relates to the primary structure and external moisture of a residential building and small to medium apartment buildings. This does not apply to outbuildings, non-structural internal carpentry work, commercial buildings or apartment buildings over 10 metres high.
- Residential building consent applications that include RBW must be accompanied by a Certificate of Design Work (Form 2A) from a Design Licensed Building Practitioner or a statement from a NZ Registered Architect or Chartered Professional Engineer unless an owner-builder is carrying out the work.
- **Owner-Builder:** If an owner-builder is carrying out the work, the application must be accompanied by a Statutory Declaration as to Owner-Builder Status (Form 2B). If there is a change to the owner-builder or they are no longer carrying out the work, the owner must provide Council with a Notice of Owner-Builder (Form 2C).
- **Licensed Building Practitioner (LBP):** The applicant must advise Council, in writing, as soon as possible and **BEFORE** construction begins of any LBP/s who will be carrying out or supervising the RBW. The applicant must also advise Council in writing if a LBP ceases to be engaged to carry out or supervise RBW or if a new LBP is engaged.
- When booking an inspection for RBW you must advise who the LBP is that is carrying out the work. If you cannot provide this information an inspection may not be carried out.
- At the completion of the work all LBP's must provide a Record of Building Work to the applicant. All of these Records of Work must then be provided to Council together with an application for a Code Compliance Certificate. If all of these documents are not provided Council will not sign off the work or issue a Code Compliance Certificate.

If you would like to know more about Restricted Building Work and the LBP scheme, information is available from the Ministry of Business, Innovation and Employment's website <http://www.business.govt.nz/lbp>

Section 40 of the Building Act 2004 states that it is an offence to carry out building work except in accordance with a consent (in this act called a "building consent") issued by the territorial authority, in accordance with this Act. The Act, provides for fines on conviction of up to \$100,000 for offences for building without consent.

Building consent applications are required to be made in the prescribed form and be accompanied by plans/specifications as required by the territorial authority.

PROCESSING BUILDING CONSENT APPLICATIONS

All consents are required to be granted within 20 working days. In circumstances where an application does not contain adequate information, or further information has been requested, the "clock" is stopped until all the required information has been received.

If the additional information is not received within three months of being requested, the consent application will

be cancelled and returned to the applicant with an invoice for all the costs incurred up to that time.

The consent application is evaluated to determine if the proposal complies with the mandatory requirements of the New Zealand Building Code. Technical building work outside the area of Buller District Council's expertise may require peer review with any associated costs payable by the applicant. Once processed, and after payment of any additional fees, the consent will be issued electronically although a hard copy of the consent documents will still be provided and these must be kept on site. Council will also retain an electronic copy of all consent documents.

PROOF OF OWNERSHIP

The Building Act 2004 requires every consent application to be accompanied by a Certificate of Title and/or Lease Agreement or Agreement for Sale and Purchase or copy of current rates demand, or other legal document.

• PLANS AND SPECIFICATIONS

If application is made in hard copy only one copy of the plans, specification and supporting documents are required. All drawings must be to an appropriate metric scale and lodged with the application.

The plans and specifications must show complete details of design and description of construction, materials and workmanship and shall be of sufficient clarity to show the exact nature of the proposed undertaking.

In addition to the structural details required, the plans and sections shall show every floor of the proposed building, the dimensions, position and intended use of the rooms and the situation of the flues, fireplaces, stoves and chimneys. The plans and sections should further show the ground levels and finished floor height levels, both existing & proposed, adjoining the building, the proposed means of water supply and also the means proposed to deal with all stormwater and drainage.

• SITE PLANS

Site plans are required to show the location and size of all existing buildings and the proposed buildings on the property. In rural areas where it is not feasible to draw locality plans to scale, a plan should be drawn detailing distances to legal boundaries.

All site plans should show distances to boundaries and distances between buildings and the position of north and location of any overhead power lines.

• BUILDING VALUES

Values of buildings are based on the estimated completed cost of work, as currently defined by MBIE and include material and labour costs.

• PROJECT INFORMATION MEMORANDUM

An owner who is considering building work or applying for a building consent may make a specific application to Council requesting relevant information on the property from Council records. Such information may be requested either before or at the same time as applying for a building consent.

The information evaluates such topics in relation to the building proposal as hazards, i.e. contaminants buried, erosion prone, subsidence, flooding etc. Other matters such as planning requirements, NZ Fire Service evaluation, public utilities, heritage status, sewerage, stormwater and vehicle approach requirements are also included in the memorandum.

NOTE: A Project Information Memorandum (PIM) is no longer mandatory.

• EFFLUENT DISPOSAL

If you are proposing to build in an area which does not have a reticulated sewage disposal system or requires an 'on site' effluent disposal system, resource consent for discharge permit may be required from the West Coast Regional Council if the system does not meet the discharge provisions and rules. The District Council may approve applications under delegation for residential disposal systems only. Application forms and percolation test sheets are available from either the District or Regional Councils.

• RESOURCE CONSENTS

Sufficient time must be planned to obtain any required resource consent. **If resource consent has not been obtained then the building work may not proceed until resource consent is granted.**

• WATER SUPPLY

All applications for building consents are required to identify the source of potable water supply. Rainwater collection is considered to be an acceptable source however, other sources of water supply must be tested to verify that the water is potable (i.e. safe to drink).

• SEWER/STORMWATER/WATER

In areas where reticulated water supply and sewer and stormwater disposal are available but connections are not made to the property, new connections must be provided. Application forms are available from Council and should accompany the building consent application.

• VEHICLE APPROACH

All residential properties are to have an approved vehicle approach from the formed road access to the boundary. On properties where an approved vehicle approach is not installed, or additional approaches are required, application forms are available from Council and should accompany the consent application.

• INSPECTIONS DURING CONSTRUCTION

Periodic inspections are required during construction to verify compliance with the Building Code and the approved consent documents.

Each consent issued details which inspections are required during the course of construction. Inspections are recorded electronically and an inspection report is emailed to the applicant and/or agent. A Customer Guide to Inspection Requirements is available from Council offices or our website www.bullerdc.govt.nz.

An applicant has twelve months from the date the consent was issued to start work or the consent will lapse.

• COMPLETION OF BUILDING

When building works have been completed, the owner must apply to Council for a Code Compliance Certificate by lodging an "Application for Code Compliance Certificate". Council is able to supply you with a copy of this form if required.

If the project involved restricted building work, you must provide all Records of Work from the Licensed Building Practitioners who carried out the work or a Code Compliance Certificate will not be issued.

Council must make a decision after two years from the date the consent was granted as to whether a Code Compliance Certificate should be issued. If you are unable to complete work within this timeframe you can apply to Council for an extension of time.

• PUBLIC BUILDINGS

It is an offence to allow the public access to a building intended for public use without a *Code Compliance Certificate* or *Certificate for Public Use* being issued or for a developer to sell a building without a Code Compliance Certificate being issued or a Form 1 Agreement in place.

• COMPLIANCE SCHEDULES

Buildings which have existing Compliance Schedules may be issued with an upgraded schedule to reflect the new systems installed. Please note that some old systems will not be included. This will be issued at time of issuing the Code Compliance Certificate.

Residential

PIM / Building Consent Application Checklist

(BAM 002-R in conjunction with form BAM 002)

PROJECT NO:

Project address:

Supplied	N/A	Council
		NB The following is required on application in sufficient detail to show compliance with all aspects of the District Plan and the New Zealand Building Code. Please complete this Checklist in FULL. Additional information may be requested during processing of the application.
✓	✓	PIM
		Application form COMPLETED & signed
		DEPOSIT as applicable
		Ownership Details: eg. Recent Certificate of Title / sale & purchase agreement / Lease Agreement / current Rates demand. A subdivision scheme plan is required for a new site where Title is not yet available.
		Copies of drawings as specified in the cover sheet <i>If restricted building work, a memorandum (Form 2A: Certificate of Design Work) signed by a Design LBP, NZ Registered Architect or Chartered Professional Engineer must also be provided.</i>
		Form 2A: Certificate of Design Work
		Form 2B: Statutory Declaration as to Owner-Builder Status
		Site Plan – either to scale or with heights, bulk and location measurements showing:
		– All new & existing buildings, swimming pools
		– Any heritage buildings / trees or archaeological site information known
		– Legal & notional boundaries (existing & proposed), easements, waterways, shared access ways / other areas with building setbacks dimensioned
		– Building & site areas (including floor areas (m ²) for all floors)
		– Vehicle access, crossing location, manoeuvre, and parking area
		– Street trees, poles, sumps, manholes, traffic islands outside the property
		– Any hard-standing (sealed or concrete) areas with proposed drainage
		– Landscaped areas required by District Plan indicated
		– Any significant trees on the site
		– Retaining walls
		– Fire rated walls, eaves
		– All activities on a site indicated
		– Proposed & existing site & floor levels
		– Existing & proposed contours, drive gradients and building heights (for hill or sloping sites)
		– Intentions for the disposal of stormwater & sewer
		– Storage location and capacity of Hazardous Substances (ie LPG, diesel, home heating oil etc)

----- **STOP HERE IF THIS IS A PIM ONLY APPLICATION** -----

BUILDING CONSENT

(in addition to the above PIM information)

Supplied	N/A	<p>NB The following is required on application in sufficient detail to show compliance with all aspects of the District Plan and the New Zealand Building Code. Please complete this Checklist in FULL.</p> <p>Additional information may be requested during processing of the application.</p>	Council
✓	✓		✓
		Multi Proof: Has a Multi Proof Certificate been issued for this project. If yes include copy of DBH Certificate.	
		Project Information Memorandum (if already issued) plus all attached forms	
		Foundation Plans (timber or concrete slab) including all details	
		Drainage Plans - full design details including both Sewer & Stormwater and any disposal methods	
		Detailed Floor Plans - fully dimensioned and notated, including location of Smoke Alarms	
		Detailed Elevations - including door & windows showing opening sashes	
		Cross Sections - to show all relevant construction, especially through difficult areas of the building and changes in building form	
		Timber Treatment - the species, grading & treatment of all timber specific to the project is to be specified on the drawings , ideally on the cross section	
		Framing Details - including floor joist layout plans if applicable	
		Construction Details - with all materials, fixings etc noted	
		Weathertightness Details - including a risk assessment matrix for all walls & all flashings	
		Internal Waterproofing Details - including all wet areas & surface finishes	
		Plumbing Details - including layout plan / schematic & water supply details	
		Specifications - relevant to the project	
		Bracing Design - calculations, schedule and layout plans	
		Roof Truss Design - including layout plan, fixings and specific design for lintels where required	
		Ground Conditions report - this will be either a report to show why it is assumed that the ground is "good ground" using Section 3 of NZS 3604:1999, or a specific ground assessment & foundation design by a suitably qualified & experienced engineer	
		Engineers Details & Producer Statement - where any specific design has been carried out (e.g. steel beams)	
		Sediment Control Management Plan (if required by site location)

FORM 2: BUILDING CONSENT AND / OR PROJECT INFORMATION MEMORANDUM APPLICATION

THE APPLICATION

Building consent applications can now be lodged online at <https://consents-westcoast.abcs.co.nz>. You still need to pay a deposit and this can be done by internet banking referencing the applicant name and site address to which the building work relates. **Hard copy applications** will still be accepted.

I request that you issue a:

- Building Consent Project Information Memorandum only (PIM)
- Building Consent only for existing PIM No : _____ (attach copy)
- Building Consent AND Project Information Memorandum

THE BUILDING

Site/Location Address: (or Rapid Number if applicable):	Current lawfully established use:
Legal Description:	Is this a staged consent? <input type="checkbox"/> Yes <input type="checkbox"/> No If yes, state number of stages: _____
Valuation Roll Number:	List Building Consents previously issued for this site:
Building Name if applicable:	

THE PROJECT

Description of building work: _____ _____ _____	Will the work result in a Change of Use of the Building? <input type="checkbox"/> Yes <input type="checkbox"/> No If Yes , provide detail of new use:
Estimated Value (incl GST) _____	Total Floor Area (all floors included): Existing _____m ² New _____m ²
Intended life of the building: <input type="checkbox"/> Indefinite but not less than 50 years; OR <input type="checkbox"/> Demolition; OR <input type="checkbox"/> Specified as _____ years	Number of levels: _____ Level/Unit No: _____ Approximate year building was first constructed: _____

The **National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health (NES)** applies to particular activities on a piece of land where an activity or industry described in the current edition of the *Hazardous Activities and Industries List (HAIL)* is being undertaken, has been undertaken, or it is more likely than not that it is being or has been undertaken.

The *HAIL* and other useful information about the *NES*, including a *User's Guide on the NES*, can be found on the Ministry for the Environment's website, <http://www.mfe.govt.nz/land/nas-assessing-and-managing-contaminants-soil-protect-human-health/about-nas>. A copy of the current *HAIL* is attached.

To help determine whether or not the NES will apply to your activity please answer the following:

Is an activity described on the <i>HAIL</i> currently being undertaken on the piece of land to which this application applies?	Yes <input type="checkbox"/> No <input type="checkbox"/>
Has an activity described on the <i>HAIL</i> ever been undertaken on the piece of land to which this application applies?	Yes <input type="checkbox"/> No <input type="checkbox"/>
Is it more likely than not that an activity described on the <i>HAIL</i> is being or has been undertaken on the piece of land to which this application applies?	Yes <input type="checkbox"/> No <input type="checkbox"/>

If 'Yes' to ANY of the above, then the NES may apply. Please answer the following:

Is the activity you propose to undertake removing or replacing a fuel storage system or parts of it?	Yes <input type="checkbox"/> No <input type="checkbox"/>
Is the activity you propose to undertake sampling soil?	Yes <input type="checkbox"/> No <input type="checkbox"/>
Is the activity you propose to undertake disturbing soil?	Yes <input type="checkbox"/> No <input type="checkbox"/>
Is the activity you propose to undertake subdividing land?	Yes <input type="checkbox"/> No <input type="checkbox"/>
Is the activity you propose to undertake changing the use of the land?	Yes <input type="checkbox"/> No <input type="checkbox"/>

If 'Yes' to ANY of the above activities, then the NES is likely to apply.

For further information about the *NES* and what is required please contact Council's Planning Department on (03) 788 9603 or planning@bdc.govt.nz.

I hereby certify that to the best of my knowledge and belief, the information given in this form is true and correct.

Applicant's Signature: (or person authorized to sign on applicant's behalf)

Signature *Name (please print)* *Date*

Hazardous Activities and Industries List (HAIL)

October 2011

A Chemical manufacture, application and bulk storage

1. Agrichemicals including commercial premises used by spray contractors for filling, storing or washing out tanks for agrichemical application
2. Chemical manufacture, formulation or bulk storage
3. Commercial analytical laboratory sites
4. Corrosives including formulation or bulk storage
5. Dry-cleaning plants including dry-cleaning premises or the bulk storage of dry-cleaning solvents
6. Fertiliser manufacture or bulk storage
7. Gasworks including the manufacture of gas from coal or oil feedstocks
8. Livestock dip or spray race operations
9. Paint manufacture or formulation (excluding retail paint stores)
10. Persistent pesticide bulk storage or use including sport turfs, market gardens, orchards, glass houses or spray sheds
11. Pest control including the premises of commercial pest control operators or any authorities that carry out pest control where bulk storage or preparation of pesticide occurs, including preparation of poisoned baits or filling or washing of tanks for pesticide application
12. Pesticide manufacture (including animal poisons, insecticides, fungicides or herbicides) including the commercial manufacturing, blending, mixing or formulating of pesticides
13. Petroleum or petrochemical industries including a petroleum depot, terminal, blending plant or refinery, or facilities for recovery, reprocessing or recycling petroleum-based materials, or bulk storage of petroleum or petrochemicals above or below ground
14. Pharmaceutical manufacture including the commercial manufacture, blending, mixing or formulation of pharmaceuticals, including animal remedies or the manufacturing of illicit drugs with the potential for environmental discharges
15. Printing including commercial printing using metal type, inks, dyes, or solvents (excluding photocopy shops)
16. Skin or wool processing including a tannery or fellmongery, or any other commercial facility for hide curing, drying, scouring or finishing or storing wool or leather products
17. Storage tanks or drums for fuel, chemicals or liquid waste
18. Wood treatment or preservation including the commercial use of anti-sapstain chemicals during milling, or bulk storage of treated timber outside

B Electrical and electronic works, power generation and transmission

1. Batteries including the commercial assembling, disassembling, manufacturing or recycling of batteries (but excluding retail battery stores)
2. Electrical transformers including the manufacturing, repairing or disposing of electrical transformers or other heavy electrical equipment
3. Electronics including the commercial manufacturing, reconditioning or recycling of computers, televisions and other electronic devices
4. Power stations, substations or switchyards

C Explosives and ordnance production, storage and use

1. Explosive or ordnance production, maintenance, dismantling, disposal, bulk storage or re-packaging
2. Gun clubs or rifle ranges, including clay targets clubs that use lead munitions outdoors
3. Training areas set aside exclusively or primarily for the detonation of explosive ammunition

D Metal extraction, refining and reprocessing, storage and use

1. Abrasive blasting including abrasive blast cleaning (excluding cleaning carried out in fully enclosed booths) or the disposal of abrasive blasting material
2. Foundry operations including the commercial production of metal products by injecting or pouring molten metal into moulds

3. Metal treatment or coating including polishing, anodising, galvanising, pickling, electroplating, or heat treatment or finishing using cyanide compounds
4. Metalliferous ore processing including the chemical or physical extraction of metals, including smelting, refining, fusing or refining metals
5. Engineering workshops with metal fabrication

E Mineral extraction, refining and reprocessing, storage and use

1. Asbestos products manufacture or disposal including sites with buildings containing asbestos products known to be in a deteriorated condition
2. Asphalt or bitumen manufacture or bulk storage (excluding single-use sites used by a mobile asphalt plant)
3. Cement or lime manufacture using a kiln including the storage of wastes from the manufacturing process
4. Commercial concrete manufacture or commercial cement storage
5. Coal or coke yards
6. Hydrocarbon exploration or production including well sites or flare pits
7. Mining industries (excluding gravel extraction) including exposure of faces or release of groundwater containing hazardous contaminants, or the storage of hazardous wastes including waste dumps or dam tailings

F Vehicle refuelling, service and repair

1. Airports including fuel storage, workshops, washdown areas, or fire practice areas
2. Brake lining manufacturers, repairers or recyclers
3. Engine reconditioning workshops
4. Motor vehicle workshops
5. Port activities including dry docks or marine vessel maintenance facilities
6. Railway yards including goods-handling yards, workshops, refuelling facilities or maintenance areas
7. Service stations including retail or commercial refuelling facilities
8. Transport depots or yards including areas used for refuelling or the bulk storage of hazardous substances

G Cemeteries and waste recycling, treatment and disposal

1. Cemeteries
2. Drum or tank reconditioning or recycling
3. Landfill sites
4. Scrap yards including automotive dismantling, wrecking or scrap metal yards
5. Waste disposal to land (excluding where biosolids have been used as soil conditioners)
6. Waste recycling or waste or wastewater treatment

H Any land that has been subject to the migration of hazardous substances from adjacent land in sufficient quantity that it could be a risk to human health or the environment

I Any other land that has been subject to the intentional or accidental release of a hazardous substance in sufficient quantity that it could be a risk to human health or the environment
