

Bin placement guide

- On collection day please ensure your bins are outside your property on the grass verge closest to where the collection vehicle passes.
- Place the wheelie bin facing the road side (Smart logo facing road).
- Make sure you do not overfill the wheelie bin. The lid must be closed for collection.
- Ensure the collection bins are placed clear of obstructions and are not hidden behind obstructions such as vehicles or shrubbery.
- Be considerate of pedestrians and driveways. Make sure your bins do not impede access or pathways.
- Where there is no footpath, or sealed surface please ensure bins are placed on level ground, this will help avoid incidental spillage.
- Make sure rubbish bags are well fastened to avoid dog strike or spillage.

Remember to place your bins out by 7.30am

How do I know what day or week I place out my Recycling wheelie bin and crate?

A label will be placed on to the side of your bin this will provide the following details:

- Bin number
- Street
- Property Number
- Day and week (Week 1 or 2)
