27 January 2025

To whom it may concern

In regards to the Proposed 21 Lot subdivision at the Corner of Wilsons Lead Road and Tauranga Bay Road at Cape Foulwind as per provided drawings 510322-V1-011 and 510322-V1-021.

I can confirm that there is sufficient capacity on the Buller Electricity 11kV distribution Network to supply the proposed subdivision for domestic residential housing. To supply the subdivision permission from the owner of the land on the opposite side of Wilsons Lead Road and an easement in favor of Buller Electricity Ltd would be required to install an 11kV underground cable or overhead line to connect to a transformer and associated LV reticulation for the subdivision. The installation of all additional distribution and reticulation infrastructure and easement would be required to be paid for by the subdivider.

A handwritten signature in black ink, appearing to read "Dale Ross", with a long horizontal stroke extending to the right.
